Summary

Computer Science Engineering student with a strong foundation in programming, problem-solving, and computer science fundamentals. Interested in developing practical software solutions and continuously improving technical skills through academic projects, internships, and hands-on learning. Looking for an opportunity as a Software Engineer or Full Stack Developer to contribute and grow in a professional environment.

Education

Coimbatore Institute of Engineering and Technology

2023 – Present

B.E. Computer Science Engineering | CGPA: 8.33/10.0

Coimbatore, Tamil Nadu

Vidya Vikasini Matric Higher Secondary School

2021 – 2023

Higher Secondary Education | Percentage: 79%

Coimbatore, Tamil Nadu

Skills

Languages	Python, JavaScript
Frontend	HTML5, CSS3, React.js
Backend	FastAPI, Node.js
Databases	MySQL, MongoDB
AI	Gemini API, Ollama LLMs
Tools	Git, GitHub, VS Code
Core CS	Object-Oriented Programming, DBMS
Soft Skills	Problem Solving, Creative Thinking, Communication, Troubleshooting, Leadership, Team Collaboration

Work Experience

AI/ML Intern – Nxtlogic Software Solutions

June 2025 – July 2025

Coimbatore

- Engineered AI automation features using Ollama LLM and Gemini API, reducing manual data processing by 60% and improving response efficiency by 40%.
- Developed and deployed 5+ AI projects utilizing Python, Flask, OpenCV, Pandas, NumPy, and Scikit-learn, achieving a 98% accuracy rate.
- Streamlined AI feature integration into web applications by collaborating with the development team, supporting the successful delivery of projects.
- Technologies: Python, Flask, OpenCV, Pandas, Numpy, Scikit-learn, Git

Projects

Stocx – AI-Powered Retail & Business Management System

Introduced a full-stack retail ERP platform for inventory, sales, customer, expense, and financial management, processing 100+ real-time invoices with 95% OCR extraction accuracy.

Tech Stack: HTML, CSS, JS, Flask, MongoDB, OCR, Gemini API, Git

AgentForge – Custom AI Agent Development System

Built an AI agent framework with RAG, persistent memory, and 5+ API integrations, improving response relevance by 35% and automating information retrieval, task execution, and workflow management.

Tech Stack: React.js, Flask, MongoDB, Ollama LLM, Git

PRISM – AI-Powered Frontend Assessment

Developed an automated frontend assessment platform using Gemini API and Puppeteer, evaluating 100+ User Interface components and reducing manual review effort by 80% through visual testing, screenshot comparison, and automated scoring.

Tech Stack: HTML, CSS, JS, Flask, MongoDB, Puppeteer, Gemini API, Git

Achievements

- The Top Innovative Idea at the TECHNOVIBES Hackathon for developing FoodLink.
- Runner-Up – 24-Hour National Hackathon.
