## Summary

Computer Science Engineering student with hands-on experience in web development and a growing understanding of programming and development concepts. Interested in developing practical software solutions and continuously improving technical skills through academic, personal projects, and hands-on learning. Looking for an opportunity as a Full Stack Developer or Software Developer to contribute and grow in a professional environment.

## Education

### Coimbatore Institute of Engineering and Technology

2023 – Present

Coimbatore, Tamil Nadu

B.E. Computer Science Engineering | CGPA: 8.43/10.0

### Vidya Vikasini Matric Higher Secondary School

2021 – 2023

Coimbatore, Tamil Nadu

Secondary Education | Percentage: 79%

## Skills

|                 |                                                                                   |
|-----------------|-----------------------------------------------------------------------------------|
| Languages       | Python, JavaScript                                                                |
| Frontend        | HTML5, CSS3, React.js, Tailwind CSS                                               |
| Backend         | FastAPI                                                                           |
| Databases       | MySQL                                                                             |
| Developer Tools | Github, Visual Studio Code                                                        |
| Core CS         | Object-Oriented Programming, Git Version Control, DBMS                            |
| Soft Skills     | Problem Solving, Creative Thinking, Communication, Leadership, Team Collaboration |

## Work Experience

### AI/ML Intern – Nxtlogic Software Solutions

June 2025 – July 2025

Coimbatore

- Engineered AI automation features using Ollama LLM and Gemini API, reducing manual data processing by 60% and improving response efficiency by 40%.
- Developed and deployed 5+ AI projects utilizing Python, Flask, Pandas, NumPy, and Scikit-learn, achieving a 98% accuracy rate.

## Projects

### Stocx – AI-Powered Retail & Business Management System

Introduced a full-stack retail ERP platform for inventory, sales, customer, expense, and financial management, processing 100+ real-time invoices with 95% OCR extraction accuracy.

Tech Stack: HTML, CSS, JS, Flask, MongoDB, OCR, Gemini API, Git

### PRISM – AI-Powered Frontend Assessment

Developed an automated frontend assessment platform using Gemini API and Puppeteer, evaluating 100+ User Interface components and reducing manual review effort by 80% through visual testing, screenshot comparison, and automated scoring.

Tech Stack: HTML, CSS, JS, Flask, MongoDB, Puppeteer, Gemini API, Git

### AgentForge – Custom AI Agent Development System

Built an AI agent framework with persistent memory, and 5+ API integrations, improving response relevance by 35% and automating information retrieval, task execution, and workflow management.

Tech Stack: React.js, Flask, MongoDB, Ollama LLM, Git

## Achievements

- The Top Innovative Idea at the TECHNOVIBES Hackathon for developing FoodLink.
- Runner-Up – 24-Hour National Hackathon.
