Summary

Computer Science Engineering student with hands-on experience in full-stack development using Python, JavaScript, and React.js. Skilled in REST API design, database management, and writing clean, efficient code grounded in Data Structures & Algorithms and Object-Oriented Programming fundamentals. Looking for a Full Stack Developer Intern role to apply and grow these skills in a professional engineering team.

Education

Coimbatore Institute of Engineering and Technology

2023 – Present

Coimbatore, Tamil Nadu

B.E. Computer Science Engineering | CGPA: 8.43/10.0 | Expected Graduation: 2027

Vidya Vikasini Matric Higher Secondary School

2021 – 2023

Coimbatore, Tamil Nadu

Higher Secondary Education | Percentage: 79.16%

Secondary Education | Percentage: 80%

Skills

Languages : Python, JavaScript

Web & Backend : HTML5, CSS3, React.js, Tailwind CSS, REST APIs, FastAPI

Databases : MySQL

Tools : Git, GitHub, Visual Studio Code

Core CS : Object-Oriented Programming (OOP), Database Management Systems (DBMS), Data Structures & Algorithms (DSA)

Soft Skills : Problem Solving, Creative Thinking, Team Collaboration

Work Experience

AI/ML Intern – Nxtlogic Software Solutions June 2025 – July 2025

Coimbatore

- Designed AI automation features using Ollama LLM reducing manual data processing by 60% and improving response efficiency by 40%.
- Developed and deployed 5+ AI projects utilizing Python, Pandas, and NumPy, achieving a 98% accuracy rate.

Projects

Stocx – AI-Powered Retail & Business Management System

- Built a full-stack retail ERP application that supports inventory, sales, customer, expense, and financial workflows.
- Implemented invoice processing with OCR and Gemini API, achieving 95% extraction accuracy on 100+ invoices.

PRISM – AI-Powered Frontend Assessment

- Built an automated frontend assessment platform using Puppeteer to evaluate user-interface components.
- Automated component scoring and review workflows on 100+ UI components, reducing manual effort by 80%.

Repo: github.com/Ram-1922/Amypo_PRISM

AgentForge – Custom AI Agent Development System

- Developed an AI agent framework with persistent memory for context-aware interactions and task execution.
- Integrated 5+ APIs to automate information retrieval, workflow management, and external-tool interactions.

Repo: github.com/Ram-1922/Multi-Agent-Development-Orchestration-Platform

Achievements

- The Top Innovative Idea at the TECHNOVIBES Hackathon for developing FoodLink.
- Runner-Up – 24-Hour National Hackathon.
